

MARINE SHIRT SIZING GUIDE

Please note that all measurements are in centimetres.

To use: Please measure your body and find the closest measurement, then order that size.

For best results have another person take your measurements and measure firmly against your body, holding the measuring tape horizontal the whole way around.

The measurements provided are body measurements. All measurements provided are approximate and for reference only. The size guide chart is a guide only, the best way to determine your size is always to try the garment on.

Results will vary based on individual wearer's fitting preference.
